But have you ever wondered where these magical signals come from? The answer lies all around us, in the mysterious "boxes" and "antennas" standing on rooftops, roadsides, ...

A base station connects your phone to the network. It acts as a hub between mobile devices and the core system.

Base stations use antennas mounted on cell towers to send and receive radio signals to and from mobile devices within their coverage area. This communication enables ...

A cell site (or cell tower, or cellular base station) is a cellular-enabled mobile device site where antennae and electronic communications equipment are placed - typically ...
