---

In 2025, we expect 7.7 GW of wind capacity to be added to the U.S. grid. Last year, only 5.1 GW was added, the smallest wind capacity addition since 2014. Texas, Wyoming, and ...

In this study, we explored the current and future value of utility-scale hybrid energy systems comprising PV, wind, and lithium-ion battery technologies (PV-wind-battery systems).

Discover how energy storage technologies, such as lithium-ion and solid-state batteries, are essential to the renewable energy transition. Learn more about advances, ...

Market forecasts underline the explosive demand for energy storage. According to BloombergNEF, the world will need over 1,000 GW ...
