We propose a coordinated spatio-temporal operation of wind-solar-storage-powered DCs considering building thermal inertia, which improves the consumption of ...

To address challenges such as consumption difficulties, renewable energy curtailment, and high carbon emissions associated with large-scale wind and solar power

This article fully explores the differences and complementarities of various types of wind-solar-hydro-thermal-storage ...

This paper presents a coordinated spatio-temporal operation of wind-solar-storage-powered DCs considering building thermal inertia.
